### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: This examiner is withdrawing the outstanding rejection of the claims. With respect to the teaching of Makino, this reference does not teach nor render obvious the top cover having a top end that is located within a range defined between the first and second portions of the at least one gas hole of the second cover as required by claim 1. At best, fig. 6a and 6b show the top end being level with the top outer perimeter of the gas holes whereas claim 1 requires the top end be located in a range between a first and second portion of at least one gas hole. With respect to the teaching of Kato, this examiner does not believe motivation exists for locating all the holes of the first cover of fig. 11 closer to the base end of the cover assembly. Although Kato discloses embodiments having all of the gas holes 106 of the first cover above the gas holes 110 of the second cover (see fig. 7 and 9 for example), the gas holes of the second cover for these embodiments do not read on the defined first and second portions discussed above with reference to Makino. Moreover, the location of holes 106 in these earlier embodiments stemmed in part from the use in these earlier embodiments of an intermediate flange (e.g. 302 or 312 in fig. 7 and 9), which the embodiment of fig. 11 entirely lacks. There is no motivation to pick and choose the gas hole placements of the first cover of the various working examples for use with the gas hole placements of the second cover of comparative example of fig. 11 absent a particular suggestion from the prior art for doing so. Kato col. 14, ll. 22-30 (relied on by the previous examiner) does not motivate one to do so because all this passage states is that water invasion is prevented because of an intermediate element 104 and fig. 11 lacks any such intermediate element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

On the IDS dated 3-13-2008, the reference to Kato has been lined through because this reference was already listed on an earlier PTO-892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to KAJ K. OLSEN whose telephone number is (571)272-1344. The examiner can normally be reached on M-F 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nam X. Nguyen can be reached on 571-272-1342. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
